

Antigone in Molenbeek

Original title: Antigone in Molenbeek

The story of Antigone, the girl who buries her brother against the will of authority, is more than 25 centuries old, yet it is more topical than ever. Starting from *Antigone in Molenbeek* - Stefan Hertmans' contemporary adaptation - theatre director Guy Cassiers turns the story into an immersive virtual reality experience, allowing the spectator to identify with Antigone and to confront the misunderstanding and prejudices of a patriarchal society.
