

# Paradigma

Original title: Paradigma

Using only archive footage, *Paradigma* reveals that the problems we're facing today are anything but recent. Our economy, the many consequences of climate change, distrust of democracy and even fake news have been around for decades. *Paradigma* is a cinematic essay showing why we fail as a collective to fundamentally tackle all of these challenges, and appear to be stuck in a loop. Our societies are held together by the stories we tell. However, these stories have the potential to evolve into habits and traditions which, fortified over millennia, become inescapable. The unconscious paradigms shaping our daily actions can only be adjusted to meet our needs if we consciously recognise and acknowledge them for what they are.
