

The Interview

Original title: The Interview

The Interview uses the immersive nature of VR to put you, the participant, in the position of an immigration officer. It is your first day at work and you are welcomed by a colleague who will assist you during a series of interviews with asylum seekers. You ask them questions and sift their reasons for applying for asylum. Afterwards, it is up to you to decide who can stay and who must be sent back. Your decision will have an enormous impact on the future of these people. How easy is it to make a decision when that asylum seeker is sitting in front of you?
