

# The Miracle of Almería

Original title: Het Mirakel van Almería

At the far end of Europe, on the southern border of Spain, lies Almería. It is home to Europe's largest vegetable garden, and the place our tomatoes come from, even in winter. But behind all the plastic sheeting, strange things can happen. In *The Miracle of Almería*, farmers and migrant workers start a dialogue in order to understand how, in the space of 50 years, Almería grew from an empty desert, to a kingdom covered in plastic, to an exhausted wasteland. Through the use of imagination, we try to find the blind spots of our capitalist system.
