

Wilding

Original title: Wilding

Wilding is an experience in 360° audio that immerses you in a distant and mysterious past, when mythology was still part of everyday life. You will hear mythical creatures from old stories come back to life and people testify to their encounters with water devils and white women. You will be stimulated, but also challenged: are we really so different from our ancestors? In this invisible world, soundscapes, music and stories merge with the landscape. With sound as your compass, you find your way, each choice a new twist.
